Reasons for Allowance

Upon receipt of the amendment after final received 6/28/07, the finality of the previous action has been withdrawn.

1. The following is an examiner's statement of reasons for allowance: The subject matter of the independent claims could not be found and were not suggested by the prior art of record.

The subject matter not found is a fluid control device comprising a first fluid path and a second fluid path and a valve member having a valve member body portion and a projection portion, and a housing member having a first housing member and a second housing member, the first and second housing members being formed of different materials such that either the first housing member has a larger thermal contraction compared to the material of the second housing member, or the material of the first housing member is polypropylene resin and the second housing member is polycarbonate resin, wherein the housing portion is formed through a fitting of the two housing members without using adhesives, in combination with the features of the invention substantially as claimed.

2. The closest prior art of record is Larrain et al (US 2002/0002350). Larrain discloses a valve arrangement having a housing and a valve having a valve body and a projection, but fails to teach the housing being formed of two housing members of different materials.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
